EXPERIMENT – 2

AIM - To design and develop a simple Company Landing Page using HTML and CSS by applying semantic HTML structure and basic styling techniques to create a clean, responsive, and user-friendly webpage.

Task -

Task 1: Project Setup & Introduction

Create the project folder and basic HTML–CSS files. Add company name and introduction section.

Task 2: HTML Structure

Design the webpage using semantic HTML sections like header, about, services, testimonials, and contact.

Task 3: CSS Styling

Apply CSS for layout, colors, spacing, and overall page design using classes and IDs.

Task 4: Services Section

Display at least three company services with name and description.

Task 5: Testimonials Section

Add two customer testimonials with proper formatting.

Task 6 (Bonus): Contact Form

Create a contact section with details and a simple contact form (UI only).

HTML CODE –

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">
